

YASHASWI SHRESTHA

Fort Worth, TX | (978) 518-6434 | yshrestha2006@gmail.com | linkedin.com/in/yashaswi-shres | github.com/yshrestha06

EDUCATION

Texas Christian University — Fort Worth, TX

Expected May 2028

B.S. in Computer Science, Minor in Mathematics and General Business | GPA: 4.0

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, SQL, HTML, CSS

Frameworks & Tools: React.js, Node.js, Express.js, Spring Boot, REST APIs, Git, GitHub, Linux

Databases: PostgreSQL, MongoDB, MongoDB Atlas, Mongoose

Core Competencies: Data Structures & Algorithms, OOP, Full-Stack Development, API Development, Multithreading & Concurrency, Networking, Debugging

EXPERIENCE

Undergraduate Research Assistant, Texas Christian University

Aug 2026 – Present

Foundation World Model Dataset for AI-Native 6G Networks

- Contributing to a research initiative building a temporal dataset that trains AI models to predict how 6G wireless networks evolve, extending prior lab work on AI-based beamforming, channel estimation, and network telemetry.
- Building a DeepMIMO-based simulator to generate time-varying network states and training/benchmarking models — including LSTMs and Transformers — using PyTorch and TensorFlow to predict future network behavior.

AWS ReachBack — Amazon Web Services

Aug 2026

Austin, TX

- Selected as 1 of ~50 participants for an invite-only AWS and AI cohort covering cloud computing, artificial intelligence, and prompt engineering, while pursuing AWS certifications.

Nepal-US AI Hackathon 2025

Aug 2025 (48 hrs)

Participant, Virtual

- Built a React-based web app that analyzed food images and generated nutritional information, integrating external APIs and health-risk detection features in an Agile, cross-time-zone team.

Building Supervisor, TCU University Unions

Aug 2025 – Present

Promoted from Event Specialist, Fort Worth, TX

- Supervise student staff and manage daily building operations and campus events, coordinating setup, teardown, and technical support to keep facilities event-ready.
- Deliver, troubleshoot, and maintain A/V equipment for on-campus events while training clients and tracking inventory.

PROJECTS

Fitness Tracker Web Application

Ongoing

Java, React, Spring Boot, PostgreSQL, REST APIs | github.com/yshrestha06/Fitness-Tracker

- Developed a full-stack web application using React, Spring Boot, and PostgreSQL for workout and fitness data management, with RESTful APIs supporting full CRUD operations.
- Built a responsive React frontend with reusable components and dynamic state management.

Personal Website with Contact Form

Fall 2025

React, Node.js, Express.js, MongoDB | github.com/yshrestha06/personal-website

- Developed and deployed a full-stack web application; designed RESTful API endpoints to process, validate, and store form submissions using MongoDB Atlas and Mongoose schemas.

Multi-Client Chat Application

Spring 2025

Java, Sockets, Multithreading | github.com/yshrestha06/Multi-Client-Chat-Application

- Engineered a multi-threaded client-server application supporting concurrent users, private messaging, and real-time updates using Java socket programming and thread synchronization.

LEADERSHIP & ACTIVITIES

- President, South Asian Intercultural Association, TCU (2025 – Present); previously Marketing Chair — lead the executive board and plan cultural, educational, and social events.
- Member, Computer Science Society & Society of Women Engineers, TCU (2024 – Present).

HONORS & AWARDS

- Dean's Honor List & TCU Scholar — every semester (Fall 2024 – Spring 2026)
- Top 10 Honor Graduate (2024)
